

This instrument has been calibrated with an Azonix Model# A1011-XX-XX-RT41 S/N 930312060 Version 0100B which has certification of calibration, traceable to the National Institute of Standards and Technology in accordance with MIL-STD-45662A

ICE WARNING

When the temperature drops to 34°F (1°C) the display will flash "ICE" 5 times then scroll "ICE" 5 times and then flash "ICE" 5 times again and return to normal temperature monitoring. The "ICE" warning will not flash again until the temperature rises to 38°F and drops back to 34°F again.

- Mount the sensor where there is good air flow around it. Mirror bracket recommended.

NOTE

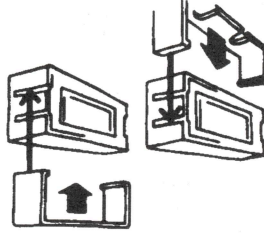

If nylon wire ties are used to secure the sensor cable, Do not over tighten...Over tightening ties will damage sensor cable assembly and is Not covered under our warranty.

If the display flashes " - - - " the sensor cable has been damaged and needs to be replaced. Call 1-800-835-8367 and order a new sensor cable part # 99150-10C. \$15.00

DIRECTIONS FOR CONNECTION
